Where to use distilled water:

Your spouse, child, pet, and other dear ones will enjoy the healthy benefits of drinking distilled water. Here are some ways to consider using distilled water:

1. Cooking your Pasta, preparing your dough, washing your vegetables, etc.
2. Your Indoor Plants. Distilled water can be like dewdrops to your plants.
3. Ice Cubes., Juice mixes, cocktail drinks, a glass of fresh cold water
4. Preparing your Coffee and Tea.
5. Your pets will LOVE distilled water

Your children will notice the better taste of distilled water. Fresh and Pure Distilled Water will help them start a healthy day. Let that smile decorate their lives and yours.

Your pet will tell the difference between pure water and contaminated water. They will chose the best. Your dog will wag its tail, thank you and “bark” for more.

THE STORY OF JEN AND KEN: Jen and Ken enjoy the pleasant experience of cooking together as a team. Their biggest accomplishment is when their hard work is paid off and their “cooked with love” meal meets their taste preference, and hard to please sophisticated friends and family circle. They want to cook using the best ingredients. They refuse to compromise on quality. That is why they start by washing their vegetables with distilled water. they boil their macaroni, steam their vegetables with distilled water.. Before dinner is served they shake and mix up cocktail drinks with distilled ice cubes.

Steve woke up in the morning barely able to make his way to the kitchen. The coffee aroma coming from his coffee maker along with the taste buds in his mouth from drinking his coffee made him prepared for the day ready for the challenge.

Fresh brewed coffee with pure distilled water allows coffee lovers to experience the pure flavor of their coffee. A sip of that coffee warms your heart, fills you with vigor, gives you a shot of energy for the rest of the day.
